Pi-Vote Client
In order to vote you need a certificate proofing your identtiy.
I need a new certificate
To get a certificate signed by the certificate authority you first need to create your certificate.
Then you must fill in your personal data which is then included in your request for certificate signing. This request will be printed out and you need to meet three voting authorities which will check your identity, sign your paper request and forward it to the certificate authority.
Finally you need to upload your request for certificate signing to the server to facilitate the signing process. You will be notified by the certificate authority via email once you certificate is signed and the response is uploaded to the server.
