In order to vote you need a certificate proofing your identity.

☒ I need a new certificate

To get a certificate signed by the certificate authority you first need to create your certificate.

Then you must fill in your personal data which is then included in your request for certificate signing. This request will be printed out and you need to meet three voting authorities which will check your identity, sign your paper request and forward it to the certificate authority.

Finally you need to upload your request for certificate signing to the server to facilitate the signing process. You will be notified by the certificate authority via email once your certificate is signed and the response is uploaded to the server.

 Your request has been submitted to the server. You must now wait for the certificate authority to process it.

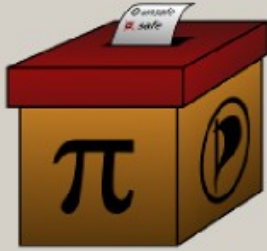

1: Fertig

Du musst deine ausgedruckte
Zertifizierungsanfrage zu den
Autoritäten bringen.

Dann musst du warten, bis die
Zertifizierungsstelle deine
Anfrage gutgeheissen hat.
