

Digitale Infrastruktur - Bug / Feature #1410

Table of contents of previous "publish" event is used

08 August 2011 17:34 - Ced

Status:	Closed	Start date:	08 August 2011
Priority:	Normal	Due date:

Target version:			
Request Type:	Feature Request		
Description			
When I export a Wiki page, the table of contents shows chapters that are not in the wiki page but seem to stem from a previous export. Seems to me that the export should be ran twice to let pdflatex update the toc?

You need to run the generation twice. At the first rn the index is generated but not displayed witch is done by the second run.
