Gibt leider schon wieder ein Update (v1.2.1.0) wegen eines Fehlers. Ich hoffe, du hast den Build-Process automatisiert ;)

Kein Problem, das "Package" besteht nur aus einem standardisierten Bash-Script, daher ist es eine kleine Sache das Ganze zu updaten (lediglich Version-String und URL anpassen).

Wenn man [#1255](#) erledigen würde, würde sogar der variable Bestandteil der URL wegfallen :)

#### #5 - 13 November 2012 10:56 - danilo

- % Done changed from 100 to 50

Upgrade zur aktuellen Version steht aus, ist jedoch blockiert durch [#1255](#).

#### #6 - 08 December 2012 23:29 - Exception

- Tracker changed from 2 to Bug / Feature

- Status changed from 2 to Needs Work

- Priority changed from High to Normal

Will break as soon as new version is out, due to version missing in the download URL.
