<b>Description</b>			
Hello,			
It may be really useful to enable sieve on the mail server and in roundcube (managesieve plugin). This will allow people to filter and dispatch mails at the higher level available.			
Currently, we have to configure each desktop client we use, preventing the configuration to work while using only the webmail.			
Thank you.			
Cheers,			
C.			
(I sent an email to support@pp, thinking it was going to create some ticket redmine - sorry)

Actually cool Idea, but the Mailserver needs to support the sieve RFC 5228, before adding it to roundcube, have you checked if you can make a sieve entry via the sieve Protocol? There is a Plugin for Thunderbird.
