Request Type: Bug Report	

Description

Status

- I have a mail account marc.waeckerlin, that forwards mails to me (no storage at PP).
- When I send mails, I use my private STMP server with my pirate FROM address

Problem

- More and more this is blocked by SPAM rules, because server domain and mail domain don't match
- So I need to send my pirate mails via your SMTP server

Request

- I need the parameters and credentials of your SMTP server, i.e.:
 - SMTP server domain, port
 - username / password
- please send me the information by mail to my pirate account

History

#1 - 15 August 2017 11:58 - jowi

- Status changed from New to Done

I think this has been fixed during the migration of our mail services.

#2 - 11 April 2018 18:45 - janfader

- Status changed from Done to Closed
